THE CONCEPT

technology and good health

Thermodul is an innovative solution of skirting board heating, that offers several advantages, first of all those for your health.

The heat is distributed uniformly and this makes **you feel good** even when set at a lower temperature than usual.

Fine particles, pollen, and dust mites do not enter the air through the motion caused by convection and so **you breathe better**.

Walls are kept dry and **your house is healthier**.

Thermodul by Hekos is the modern choice for home comfort.

activity, no more unaesthetic radiators, no more ugly stoves, no more bulky fireplaces.

on drawings that you like, feeling good at home, well-being in a beautiful and healthy house, walls as blank sheets at your disposal, more room for you, cosy living, free choice

focus on fire decoration, on valuable furniture, on photographs that speak of your life.

THE SYSTEM

Thermodul is designed to ensure **the highest comfort at the smallest size**. It's a non-intrusive solution, that leaves your walls completely free for your choice of interior design.

As there is minimal work to be done on the walls, it proves to be the best choice for those valuable buildings which you would like to **restore and conserve**.

This cutting-edge skirting board heating system works both with **water and electricity**: you can connect it to any kind of boiler, to mains electricity and to a photovoltaic system.

Moreover, Thermodul is an important ally in **energy saving**: it works with very low water volumes and, thanks to the uniformity of its heat, you can lower the thermostat.

discretion, a very valuable virtue

Fresh air at home, relaxing in a diffused and uniform temperature, living in a welcoming and comfortable house, environment helping while energy and money saving, cutting-edge heating tech

THE DES IGN

Thermodul can become almost invisible, blending in with any style, or it can express its aesthetic value thanks to its wide **chromatic range**.

And not only that, thanks to the exclusive integration of its Led components, you have a further **interior design element** and can set your house lighting as you prefer.

You can create subtle **light paths**, which pick out your house architectural forms and accompany your night walks, yet you can also set the lighting so that you can **read a book**.

I HAVE DECIDED TO:

feel good at home, live in **comfort** and **design**,
adopt a **cutting edge** solution, free up my interior design,
save energy and money, invest in **great Italian style**

heat, colour, light

Italian style, fine interior design, led lighting, smart innovation, good living, comfortable room,

technical quality, good value for money, easy maintenance, energy saving, minimal maintainy-work
